

Hello, I'm Frieda and I have to tell you, that I like the Coronavirus. I'm sorry that some of you die, but that what normally happens to us animals is worse.

Before corona, there were lots of cars, and some people of my family died. That's much better now! We have more room, there is more food and we can play or build our nests quietly. Also the grass can grow, there are lots of flowers what is very good for the bees and all of us, you too. The lake is clear, better to live in for fishes.

After the Pandemie, you maybe continue like before, but I ask you: Make a change! Nobody can live without nature.
