Waste

Ideas for Sustainability

Think

- Awareness raising
 - Dealing with environmental/waste issues in general in the classroom.
 - Especially during the lockdown when we could not do anything at school.

Separate

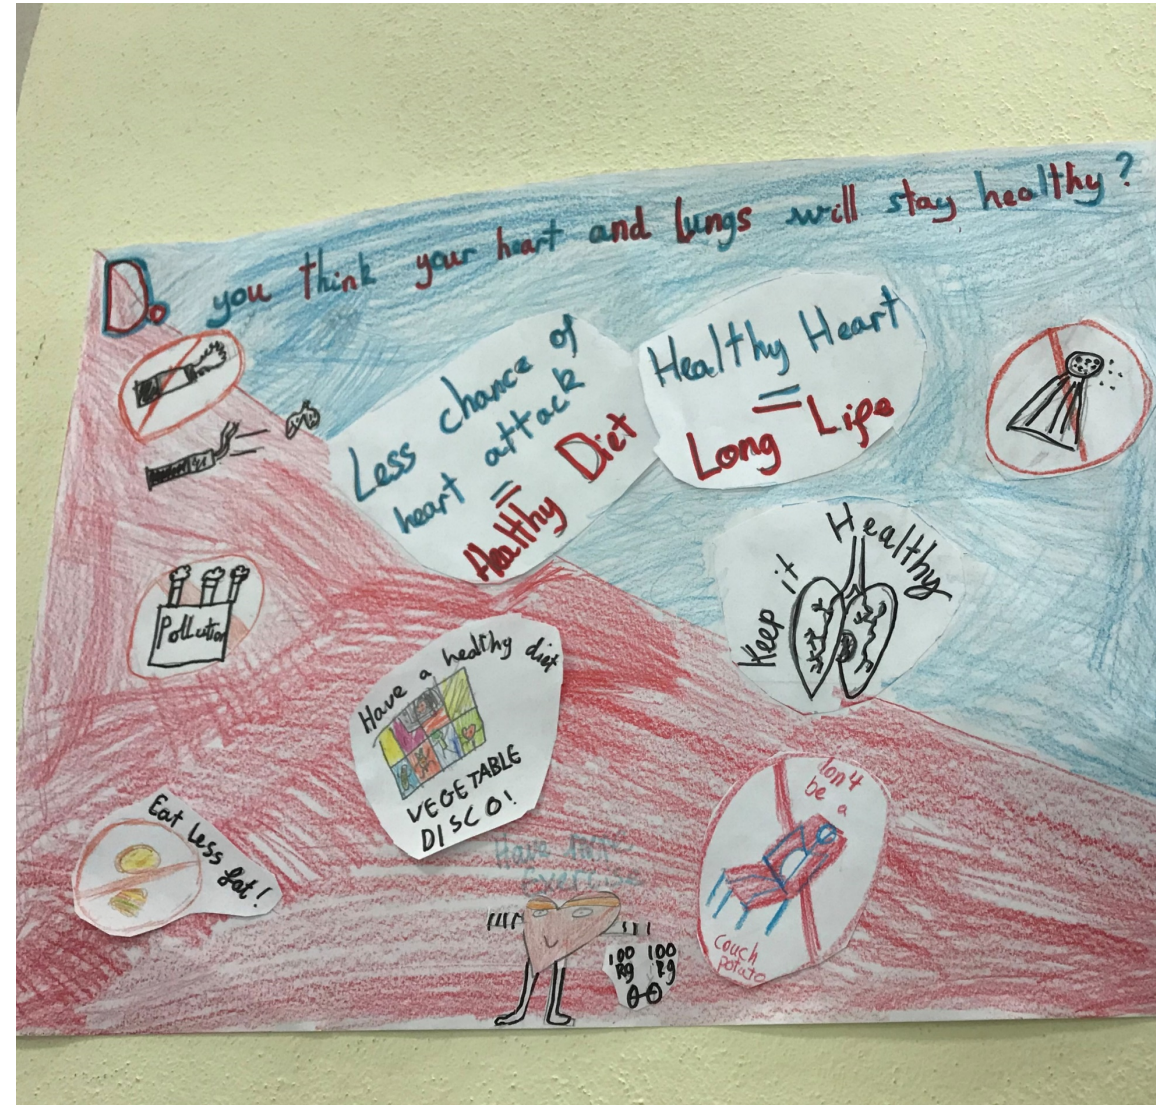

- Waste separation
 - Making clear the importance of waste separation.
 - Set up different bins where waste can be disposed of separately.

Reduce

- Waste avoidance
 - The best thing would be not to produce or to reduce waste.
 - Actions are carried out such as „No plastic Friday“.

Create awareness

- In class awareness is raised for many environmental issues. This begins, for example, with health and ends with the problem of waste.

Separation

We have different containers for rubbish distributed in the corridors throughout the school building.

The next action should be to put different rubbish bins in the classrooms as well.

Waste separation

As you can see, the students separate the waste in an exemplary manner.

Recycle Reuse Reduce

Tips!

- Replace cling film with waxed cloth.
- Instead of drinking mineral water from a plastic bottle, use tap water.
- Replace plastic lunch boxes with stainless steel ones.
- Take your own jute bag with you when you go shopping.
- Use recycled paper and label it on both sides.
- Replace plastic folders with paper folders.
- Use natural raw materials in the pencil case (e. g. a ruler made of wood)
- ...
