Greener Green schools: Developing sustainability practices in primary schools

On 3rd and 4th February the kick-off meeting of Greener Green  project took place.

It was a fantastic beginning where all the partners explain its background and role.

We are very happy 😊 to have welcomed all the team in Girona, including a very educative visit to [Col·legi Bell-Iloc](#), also a Catalan partner of the project.

Greener Green is an Erasmus+ project that aims at installing the values of a greener world from the start.

The project will provide the target groups with an Evaluation and Assessment tool on how “green ✓” their school is, action plans, training, lesson plans for teachers and even a fun platform where young children can record their green actions, get rewarding praise and motivation to continue! Blue Room Innovation will be in charge of platform development. European Partners: [Col·legi Bell-Iloc](#) - Spain [IDEC S.A.](#) - Greece [University of Liège](#)-Belgium

[FAPEL](#) .- Luxembourg [European School Varese](#) - Italy Primary School

Vareia - Greece
