

## PROVISIONS FOR COVID-19 POSITIVE PERSON

ATS sends a sms message containing the isolation requirements: the positive person must undergo a period of mandatory self-isolation, the duration of it can vary based on their vaccination status.

1. If vaccinated with a cycle completed less than 120 days ago or vaccinated with a booster dose: isolation period of 7 days minimum from the positive swab date, of which the last 3 days without symptoms, with additional swab (molecular o antigenic) negative to end the quarantine.

### DISPOSITION FOR POSITIVE PERSON CATEGORY A

2. For those who does not in category A: isolation period of 10 days minimum from the positive swab date, of which the last 3 days without symptoms, with additional swab (molecular o antigenic) negative to end the quarantine.

### DISPOSITION FOR POSITIVE PERSON CATEGORY B

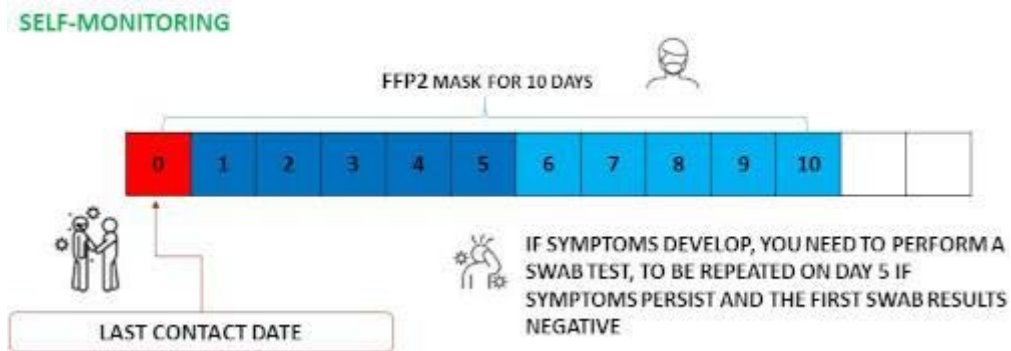

If the swab still results positive, a further swab should be taken after approximately 7 days.

In case of persistent positivity, isolation ends at day 21 with no further swab test required.

## CLOSE CONTACTS: SELF-MONITORING

No quarantine. For the first 5 days daily self-monitoring of temperature and possible symptoms. It is mandatory to use FFP2 mask for 10 days.

The self-monitoring period ends on the 10th day following absence of symptoms; if symptoms develop, a swab must be performed and to be repeated on the 5th day if symptoms persist and the first swab was negative.
